The solutions we offer
are based on the most
effective solutions
available on the market.

Velis IT Systems

As business environments grow more complex, companies struggle to keep up with the pace of change. Technology has revolutionized the efficiency and sophistication of business. Let Velis be your professional IT partner who will take care of your technology for you.

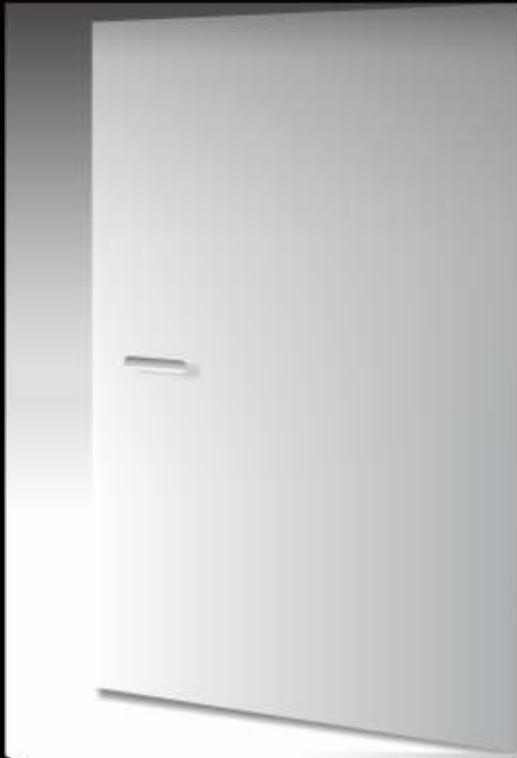

Our services encompass everything you need to evaluate, organize, build, integrate, maintain and evaluate your company's software and IT infrastructure. The Singu platform means its use can extend to your entire value chain - your suppliers, vendors, partners and customers.

We have built our own software to meet the needs of specific industries. We monitor technology's evolution and watch out for our clients, making sure their systems are up to date and offer the highest level of functionality and security.

Our business approach, professionalism and experience allow us to customize projects to meet our client's goals. We guarantee our services. From the hardware we install to the software we design, and every service in between, we want your 100% satisfaction.

Services and Solutions

- Facility and Property Management
- Customer Relationship Management
- Business Process Management
- Helpdesk
- Legal Management
- Channel Management
- Custom Software Solutions

Software

Singu is a powerful, robust, cloud-based software platform, designed by experts with hands-on experience in the relevant industry. Singu can be used by your clients, suppliers and partners, so communication among business networks is fully supported. Through the use of the Singu software, we are able to customize applications to meet the individual needs of businesses.

Too often companies find they have outgrown their software and IT systems but don't have the manpower or internal expertise to determine where to go next. Having built their own, Singu's designers understand the complexity of business. Their experience and the Singu platform provide solutions to pressing problems that are only an implementation away.

If technology is not your strength, but you need a flexible and cost effective system to run it, Velis IT Systems has your software and hardware solutions.

IT Integration

With our IT Integration services, Velis has the hardware to support critical security, communications and data storage systems. Our solutions offer the latest technology at affordable prices. Regardless of the complexity or scope of your technology needs, the Velis support team will structure and implement comprehensive, results-driven and affordable systems.
